

# BULLET RESISTANT WINDOWS & DOORS

## Combination Exchange Windows

- Choice of Clear Package Receiver or Rotary Server for Passing Larger Articles
- Shelf Has Non-Ricochet Bullet Resistant Deal Tray
- Incorporates Surround Sound Voice Transmission System

Combination Exchange Windows are two lite units, one full height and one secured above the package pass-through. The 36" x 36" standard size unit is available with a choice of Clear Package Receiver or Rotary Server. The 18" deep bullet resistant shelf is covered with a black plastic laminate. Both units come with a Level 1 Non-Ricochet Bullet Resistant Deal Tray. Perimeter frame is our Standard Inset Frame, and requires a wall thickness of at least 4-7/8". Glazing is 1-1/4" bullet resistant Level 1 Acrylic. Available frame finishes are satin anodized or duranodic bronze. Voice transmission is accomplished with Surround Sound. The standard unit is recommended for interior use. Exterior models and custom sizes are available on special order.
